INTRODUCTION

Problematique

Comment la communication des professionnels de santé influence-t-elle les réactions parentales aux recommandations vaccinales ?

Quels dialogues favorisent l'adhésion vaccinale et réduisent l'hésitation ?

Objectifs

- Les caractéristiques des pratiques de communication
- L'évaluation de l'impact de différents formats de dialogue
- L'identification des stratégies efficaces
- La fourniture des bases pour développer des interventions pratiques

CONCLUSION

L'attitude des professionnels de santé lorsqu'ils recommandent un vaccin a un impact direct sur la décision des parents.

Une communication forte et proactive semble réduire l'hésitation et encourager la vaccination.

Cependant, des recherches supplémentaires auprès d'un public plus varié sont nécessaires pour adapter au mieux les stratégies de communication et améliorer l'adhésion vaccinale.
