

AKWA GROUP

Introduction

AKWA Group is a prominent Moroccan family-owned conglomerate founded in **1932** with diversified interests in :

La^{nouvelle}**Tribune**

LAVIE **ÉCO**

Media

Energy

Real Estate

Two Major Subsidiaries

Industry Dominance

The company has established a strong market presence through:

Filling centers

A vast distribution network

Large-scale storage facilities

Current CSR Strategies

In 2024 the group has established :

**The Pôle Transition Énergétique, Environnement
et Développement Durable**

with the intent of being a pioneer in :

**Solar-Powered
Irrigation Pumps**

**Green
Hydrogen**

Natural Gas

**Desalination
Stations**

in line with Morocco's national objectives.

Current CSR Strategies

However, despite its significant influence and operations :

Akwa does not provide accessible or transparent CSR reports !

making it challenging to assess its overall **sustainability and social impact** directly.

Current CSR Strategies

Even on its website, the “**Responsabilité Sociale**” page **does not provide access to its sections neither to any report.**

Therefore, this analysis focuses on its **key subsidiaries**:

By examining their CSR strategies, **we can gain indirect insights into Akwa's approach to sustainable development and CSR**

MAGHREB OXYGENE

Maghreb Oxygen CSR Strategy :

The company's strategy is structured around four main axes :

**Stakeholder
Engagement**

**Environmental
Impact
Reduction**

**Energy
Optimization**

**Professional
Environment**

Maghreb Oxygen Environment Strategy :

In terms of environmental initiatives, MO has made significant progress in reducing greenhouse gas emissions :

Greenhouse Gas Reduction

It achieves this by optimizing its production processes and **recovering CO₂ from external sites**, thereby **lowering its carbon footprint**.

Maghreb Oxygen Environment Strategy :

Water and Energy Conservation

- Implemented measures to **reduce water and energy consumption**.
- Invested in energy-efficient technologies, like a **new cooling tower**, to further enhance efficiency.

Maghreb Oxygen Environment Strategy :

Waste Management

- Effective management of waste through recycling materials like **slaked lime**.

- Ensures safe disposal or evaporation of **liquid waste** to prevent environmental harm.

ISO Certifications as Proof of Commitment

90001

- **Focuses on quality management systems**, ensuring products and services meet customer expectations consistently.

14001

- **Relates to environmental management systems**, demonstrating the company's commitment to reducing its environmental impact.

50001

- **Concerns energy management systems**, reflecting the company's efforts in improving energy performance and efficiency.

Maghreb Oxygen On the Social Front :

Equal Opportunities & Remuneration:

- MO promotes **fairness in recruitment, offering competitive pay packages** based on **employee performance**.
- However, the company has struggled with maintaining gender equality.
- Female representation declined to **11.9% in 2023**, mainly due to the departure of **four women (one senior manager, one manager, and two employees)**.

Maghreb Oxygen On the Social Front :

Employee Well-being:

MO provides various employee benefits aimed at enhancing well-being, such as:

- **Subsidized meals**

- **Health insurance**

- **Additional perks** to support overall employee satisfaction and health.

Maghreb Oxygen On the Social Front :

Disaster Relief Contributions :

In 2023, MO, along with Akwa's fuel and gas subsidiaries, collectively donated to the Al Haouz earthquake relief efforts :

**600
MILLIONS
DHS**

AFRIQUIA GAZ

Afriquia Gaz CSR Strategy :

AG addresses key ESG challenges by implementing initiatives aimed at **reducing environmental impact, improving labor conditions**, and **maintaining corporate ethics**.

Certifications :

14001

**Environmental
Management**

18001

**Occupational health and
safety management
systems**

9001:2008

**Quality Mangement
Systems**

Afriquia Gaz Environmental Responsibility:

AG focuses on **storage, transport, and distribution** of **LPG**, **avoiding modification of the product itself.**

1. Pollution control and resource optimization strategies:

Installation of :

LED Lights

**Solar-Powered
water heaters**

**Water Saving
Fixtures**

for energy efficiency.

Afriquia Gaz Environmental Responsibility:

2. Pollution control and resource optimization strategies:

Proper disposal of **hazardous waste**, ex :

Gaz Cylinder
Paint residue

through **authorized management providers.**

Afriquia Gaz Social Responsibility:

Provides employment to over : .

1,000 workers

and promotes **fair employment, professional development,**
and **workplace safety.** .

Afriquia Gaz Social Responsibility:

Notable improvement:

Reduced workplace incidents, with only **3 accidents** recorded in 2019.

AG & MO CSR **CRITICAL ANALYSIS**

Indeed the two subsidiaries **CSR strategies** demonstrate several strengths, particularly in their alignment with the following **SDGs** :

However, both subsidiaries still have several areas to improve to strengthen their CSR strategy !

For instance, although **Maghreb Oxygen** has taken steps to improve energy efficiency, its emissions reduction strategy **lacks concrete long-term goals** aligned with international climate targets and **there is limited evidence of a comprehensive carbon neutrality roadmap** or significant investments in renewable energy sources.

For **Afriquia Gaz**, critics highlight **a significant gap between AG's stated environmental goals and its disclosed performance.**

Notably, the company **has provided no public data on its greenhouse gas emissions or concrete climate targets.**

Environmental Concerns

AG as **an LPG marketer**, the company is fundamentally tied to **fossil fuels**, and while **LPG is often touted as a cleaner-burning fuel** than coal or oil, it still contributes to carbon emissions when burned

And **there is no evidence** that **AG** has set climate-alignment goals or invested significantly in renewable energy to offset its reliance on LPG.

Abscence of Detailed Metrics

While **MO** has outlined its **CSR initiatives**, there is a **lack of detailed data and metrics** to assess their effectiveness.

Unlike international firms that publish detailed sustainability reports based on the Global Reporting Initiative or Task Force on Climate-related Financial Disclosures standards, **MO's reporting remains relatively qualitative**, making it difficult to assess its true environmental and social performance.

Governance Issues

Governance is arguably the most sensitive dimension of AG's CSR profile, as it **ties directly into the company's ownership and public reputation.**

Allegations of **conflicts of interest** have been raised by both civil society and political opponents against the main shareholder of Akwa Group who is Morocco's current Prime Minister **Aziz Akhannouch.**

Governance Issues

Au Maroc, le premier ministre accusé de
conflit d'intérêts sur fond de hausse des prix
des carburants

Le Monde

**“Conflit d'intérêts” : Akhannouch
dans le viseur du PJD après
l'attribution du marché de
dessalement de l'eau de mer**

TELQUEL

Lack of Partnerships & External Collaboration

United Nations
Global Compact

The group is **notably absent from major international sustainability platforms:** it is not a participant in the **UN Global Compact**, nor does it report to the **Carbon Disclosure Project**.

Workplace Environment

For both subsidiaries, heavy emphasis is put on protecting and valuing their employees, and **workplace health and safety are touted as top priorities.**

To uphold this, **AG** instils a culture of hygiene and accident prevention, providing staff training and enforcing **strict safety rules in compliance** with regulations, yielding positive results, with the **frequency of workplace accidents being reduced in recent years.**

Workplace Environment

That said, beyond **safety workshops**, little information is available about other **trainings or opportunities for career advancement.**

Likewise, the company **reports a negligible number of lost workdays due to labour strikes or industrial disputes**, which could either **indicate that the company maintains adequate dialogue with employee** representatives and addresses grievances proactively or **it could be an indicator of weak unions.**

Lack of **Diversity** and **Inclusion**

MO saw a **decline in female representation** in 2023, with the female management rate dropping from **20%** in 2022 to **14.3%** in 2023, while only **8.8%** of **AG** employees were women in 2019.

Although the companies have outlined plans to improve diversity, there is no clear evidence of progress or measurable outcomes.

Gender pay gap data is not disclosed, and **upper management remains almost exclusively male.**

RECOMMENDATIONS

Strengthening CSR Strategy and Reporting

Publish an **annual CSR/Sustainable Development report**

Align with Global frameworks (GRI, SASB, TCFD)

Shift from PR-based to performance-based CSR

**Set clear, measurable commitments
and report transparently**

**Aim for CGEM CSR Label
and ethical certifications**

Environmental Transparency and Climate Action

Adopt measurable decarbonization targets

Improve ESG reporting:

- **Align with GRI, CDP, TCFD**
- **Publish ESG reports with performance indicators**

Invest in:

Renewable energy integration

Green hydrogen

Carbon capture technologies

Social Responsibility and Inclusion

Create a strong Diversity & Inclusion (D&I) policy

Increase women in leadership roles

Adopt:
Bias-free recruitment (anonymous CVs)
Unconscious bias training

Promote:
Flexible work arrangements
Employee resource groups (e.g., for women)

Support communities:
Vocational training
Education programs
Energy access in remote areas

Governance, Ethics, and Transparency

Full compliance with competition laws

Independent CSR and ethics oversight

Anti-corruption policies and political ties

Governance, Ethics, and Transparency

For **AG**: Clarify separation from **Political Influence**

Governance, Ethics, and Transparency

Adopt FPIC policy for community engagement
Conduct human rights risk assessments

Set up independent grievance mechanisms
